Scientists have widely used the Raspberry Pi in combination with electronic sensors and actuators, in particular to study animal behaviour and physiology. For example, Longley et al. (2017) and Pasquali et al. (2017) used infrared-motion detectors to monitor the activity levels of rats and arctic invertebrates respectively.

Broad-scale applications of the Raspberry Pi: A review and ...

The American flamingo (*Phoenicopterus ruber*) is a large species of flamingo closely related to the greater flamingo and Chilean flamingo. It was formerly considered conspecific with the greater flamingo, but that treatment is now widely viewed (e.g. by the American and British Ornithologists' Unions) as incorrect due to a lack of evidence. It is also known as the Caribbean flamingo, although it ...

LookWAYup

Thermogenese oder Wärmebildung ist die Produktion von Wärme durch Stoffwechselaktivität von Lebewesen. Wärme entsteht als unvermeidliches Nebenprodukt von Stoffwechselprozessen wie dem Energiestoffwechsel, der Verdauung und der Muskelaktivität bei Tieren. Daneben existieren besondere Stoffwechselfade (Entkoppelung der Chemiosmotischen Kopplung, Substratzyklen), in denen chemische Energie ...

De bloedsomloop, ook wel bloedvaten-, of vaatstelsel, is het systeem van bloedvaten waardoor het bloed in een organisme circuleert. Bij de term hart en vaatstelsel of cardiovasculair systeem, is ook het hart inbegrepen. De bloedcirculatie verzorgt de aan- en afvoer binnen het lichaam van voedingsstoffen, afvalstoffen, zuurstof, koolstofdioxide, hormonen, afweerstoffen, bloedcellen en ...
