Autogenic Therapy Treatment With Autogenic

Introduction [edit | edit source]. Autogenic Drainage (AD), is an airway clearance technique that is characterised by breathing control, where the individual aims to adjust the rate, depth, and location of lung volumes during respiration. AD is based on a series of physiological principles believed to enable the patient to achieve an independent airway clearance regimen that is adapted to their ...

Autogenic Drainage - Physiopedia

Autogenic training is a relaxation technique that is used to help reduce stress, typically in a therapy session, but you can also do it on your own.

Autogenic Training: What It Is and How to Do It

Autogenic training is a type of relaxation technique that can be used to help reduce anxiety, including that experienced as part of social anxiety disorder (SAD). It can be incorporated into regular treatment such as cognitive-behavioral therapy (CBT) or used on your own as a self-help strategy.

How to Practice Autogenic Training for Relaxation

Description [edit | edit source]. Muscle Energy Technique (MET) is a technique that was developed in 1948 by Fred Mitchell, Sr, D.O. It is a form of manual therapy, widely used in Osteopathy, that uses a muscle's own energy in the form of gentle isometric contractions to relax the muscles via autogenic or reciprocal inhibition and lengthen the muscle.
