Truth: You Can Get Pregnant After 40 . All that said, getting pregnant after 40 is entirely possible. Plenty of women have babies after 40 and even 41. Your risk of infertility increases at 40, along with your risks of miscarriage and pregnancy complications. It may also take a little longer for you to get pregnant.

When you're trying to get pregnant, a lot comes down to timing. After all, nature gives us a brief window each month to conceive.

While it's possible to get pregnant any day of the month (due to fluctuations in your cycle), you're much more likely to score a fertilized egg (and get the good news that you're expecting) if you work with your body's regular reproductive

even during your period? Getting pregnant (a process called conception) happens when a male sperm fertilizes a female's egg. For some people, this can happen quickly; for others, it may take longer. Out of every hundred couples actively trying to become pregnant, about 80 percent will do so within the year.
