1. Remove the oil filler cap and wipe the dipstick clean. 2. Insert the dipstick into the filler neck, but do not screw it in. 3. If the level is low, fill to the upper level mark with the same oil that is recommended for the engine (see engine oil recommendations on page 8).

### Thank you for purchasing a Honda engine.

To change the oil in your Honda engine, start it up and let it run long enough to warm the oil to ensure it will flow smoothly when drained. Turn the engine off, and place a shallow bucket or drain pan beneath the drain plug on the engine. Remove the drain plug and the oil filler cap to allow good oil flow, and allow the oil to drain into the pan.

### Honda GX390

Yeah, just went thru that with a GX340 engine on my pressure washer - the thing acted like a fuel problem. It would start and run OK at idle, but under load it would run maybe 15-20 seconds and die - if I was quick enough, choking it would SOMETIMES keep it from dying. Checked the in-tank fuel filter, looked NEW.Pulled float bowl, flushed out everything with the nastiest carb cleaner I could ...

### Honda GX340™ 389cc OHV Electric Start Horizontal Engine ...

Original Message Apr 11, 2014 8:42 pm. I was changing oil on a GX340 engine on my snowblower. The manual says it holds 1.1 quarts of oil (which I read as about 35 ounces) Yet, the manual also shows that you fill up the crankcase until it's touching the threads for the dipstick. This is pretty common in the GX line (same in the GX160).

### Question on Honda GX340 engine - Abby's Guide

How long since the last oil/spark plug change? Mounted to the block near the stop switch should be a small silver module, unplug the black wire leading behind the flywheel cover. This will eliminate the low oil shut-down sensor, Then test run the unit. I have seen units that looked like the oil had never been changed, it looked like tar.
