The Geography of Multinationals (RLE International ...

In fact, the role of geography is rarely the main object of previous research (Beugelsdijk 2007). Driffield and Love (2007) link the FDI decision to certain measurable characteristics that are essentially proxies for the level of development of an industry, and the extent to which a firm can leverage its ownership advantages in order to ...

Multinational performance and the geography of FDI ...

Understanding the agglomeration, and more broadly the economic geography of MNCs and their role in shaping the global industrial landscape as a result has become increasingly important for shaping policies and promoting the benefits of globalization. Recent evidence shows that MNCs exhibit distinct agglomeration patterns (Alfaro and Chen, 2014).

Location Fundamentals, Agglomeration Economies, and the ...

Multinational corporations see both benefits and downsides of globalization. On the positive side are an increased access to markets, more labor options, partnership opportunities and possibly lower taxes. A disadvantage is that coordination can be harder with different languages and cultural norms.

The Effects of Globalization on Multinational Corporations ...

A multinational corporation (MNC) has facilities and other assets in at least one country other than its home country. A multinational company generally has offices and/or factories in different...

Multinational Corporation (MNC) Definition

Chinese multinationals have grown in size and increased their global presence dramatically over the last decade. They have emerged as formidable competitors for western incumbents. These firms have instigated profound changes, such as displaced trade and investment flows, new business models, and the emergence of a new geography of global ...

The Era of Chinese Multinationals - 1st Edition

Using a unique worldwide plant-level dataset that reports detailed location, ownership, and operation information for plants in over 100 countries, we construct a spatially continuous index of agglomeration and investigate the patterns and determinants underlying the global economic geography of multinational firms.

CiteSeerX — The Global Agglomeration of Multinational Firms

Globalisation refers to the integration of markets within the world economy, which consequently increases the interconnectedness of national economies. Multinational corporations are a function of this interconnectedness, as they can form and utilise the connections between national economies, to operate within multiple countries.

How do multinational corporations contribute to the ...

A multinational state is a sovereign state that comprises two or more nations or states. This contrasts a nation state, where a single nation accounts for the bulk of the population. Depending on the definition of "nation" (which touches on ethnicity, language, and political identity), a multinational state might also be multicultural or multilingual. ...

Multinational state - Wikipedia

Nation State's Role Diminishing Globalization led to a significant rise of multinational corporations which many believe undermined the ability of states to manage their own economies. Multinational corporations integrate national economies into global networks; therefore nation states no longer have total control over their economies.

Globalization's Eclipse of the Nation-State

Using a unique worldwide plant-level dataset that reports detailed location, ownership, and operation information for plants in over 100 countries,

we construct a spatially continuous index of pairwise-industry agglomeration and investigate the patterns and determinants underlying the global economic geography of multinational firms.

The Global Agglomeration of Multinational Firms

The role of ICT in filling the development gap between regions of the world was identified on the basis of the UN classification. ... and the expansion of activities of multinational enterprises ...

The role of transnational corporations in the ...

Multinational enterprises are perfectly placed to exploit the differences in the international integration of markets. The presence of an international capital market enables capital costs to be driven to a minimum. The existence of regional goods and services markets enables firms to exploit economies of scale across several economies.
